

## Saint-Gobain Group Cookie Policy

**In close connection with the provision of content, the websites use cookies, but they can also use other technologies with similar features or identical cookies. The information provided below and cookies apply to other similar technologies used on our sites.**

Cookies (so-called "cookies") are computer data, text files, small files stored on the computer, on mobile devices, or on other equipment of a user accessing the Internet.

A cookie is installed by requesting a server's browser (ex: Internet Explorer, Chrome) and is harmless (does not contain software, viruses or spyware, and can not access information on the user's hard disk). Only the server that sent the cookie can access it again when a user returns to the site associated with that server, and the cookies themselves do not solicit personal data to be used.

### Cookies are used for:

- a) To bring the website content to user's preferences and to optimize the use of the Internet, for example, to display information by adapting the parameters to the device's features.
- b) To create statistics that help us analyze how users interact with the service / information.
- c) To provide users with advertorial content tailored to their interests, including remarketing.
- d) To maintain the Internet session, so that the user avoids entering every page of the website and re-introduces the username and password.

Most web browsers allow the default storage of cookies in a user's terminal equipment. Users of our services can make changes to cookies at any time. These settings can be modified to block the automatic handling of cookies in the browser configuration or to be informed about them whenever browsing the Internet.

More information about the possibilities and ways of handling cookies is available in the software settings (web browser). Failure to modify cookie settings means they will be included in the terminal device guide, so we will store device information on end user access to this information

Disabling cookies may prevent certain services from using our websites, and authentication is required. Disabling cookie acceptance does not affect you, but it will diminish the ability to read or watch content.

Cookies can be included in the website's terminal device and used through collaboration with advertisers, research companies, and multimedia application providers.

### **Use of cookies**

When you visit our company website, cookies can be automatically installed and temporarily stored in your computer or hard drive memory to make it easier for you to navigate our site. Cookies do not allow us to identify you, they are used to record information about the pages you've visited on our site, the date and time of your visit, etc.
